Testimonial

The decision for me to go to Malta on a work placement was not a difficult decision. When I arrived in Malta my English was not that good. The reasons why I went to Malta was to improve my English and to learn more about ICT... I had a great time and everything was good; the apartments, colleagues and the friends who I met after work... In the last two weeks of my work placement I got an offer to stay for the rest of the summer in Malta... the company I was working for, needed a complete new website... I could further improve my English and I could have a great summer on an island... I learned more about the real ICT world. In a few words, if you need a good work placement and like to improve your English, come to ESE in Malta.
